Experience

Techbot Web Solutions Pvt. Ltd. | Jabalpur, Madhya Pradesh
React Developer | 06/2023 - Present

1. **Second-hand Commercial Vehicle Website:** Developed and implemented responsive frontend designs for a second-hand commercial vehicle website, ensuring optimal user experience across devices.
   Created and maintained an intuitive and interactive user interface, enhancing user engagement and ease of navigation.
   Collaborated with cross-functional teams to integrate APIs and optimize website performance.
   Designed and developed an administrative panel, enabling efficient management of site content and user interactions.
2. **Printing Website:**Engineered and designed the frontend of a printing website, focusing on user-centric and visually appealing interfaces.
   Implemented advanced functionalities for customization and order processing, improving user satisfaction and streamlining operations.
   Collaborated closely with backend developers to ensure seamless integration of frontend and backend systems.
   Constructed and managed an admin panel for content management and operational oversight.
3. **Matrimonial Website and Application:**Spearheaded the design and development of a matrimonial website and accompanying application, emphasizing security and user privacy.
   Implemented responsive and dynamic frontend components to facilitate user interactions and profile management.
   Integrated complex matching algorithms and search functionalities, enhancing user experience and satisfaction.
   Architected an administrative panel for effective moderation, content management, and user support

Skills

HTML 5, css3, JavaScript, ReactJS, Application Development, Bootstrap, Responsive Web Design, User interface Design, API Integration, Ionic, Tailwind, Material UI

Education

Global Engineering College | Jabalpur, Madhya Pradesh
Bachelor of Technology | 06/2023

- Relevant coursework in mechanics, thermodynamics, and engineering design.
- Developed problem-solving and analytical skills crucial for software development.
- Acquired a solid foundation in mathematics and logical thinking, applicable to programming and algorithmic solutions.
- Demonstrated ability to grasp complex concepts, essential for learning new technologies like React.js efficiently.
